## 5. OUR CODE OF ETHICS

### 5.1. How to use CELEO’s Code of Ethics

The **Code of Ethics** establishes the standards of conduct and compliance that must serve as a guide and a baseline for interpreting which decisions may be correct or incorrect when performing our professional duties, whether within **CELEO Group** or with any identified Third Party to which it results applicable in each of the geographic areas in which **CELEO Group** operates. These standards are therefore mandatory for everyone to which they are applicable and represent the conduct that is expected in general by **CELEO Group** within its business.

In general, the principle of zero tolerance must prevail over any ethical and compliance bad practices that may take place. Any doubt or query regarding the interpretation of the following conduct standards and/or the regulations developed, as well as regarding any possible failure to comply/infracton that is detected in this respect must be reported as soon as it’s known through the Transparency Channel in the geographic area concerned (for further information see section 7. “**Transparency Channel**” below).

### 5.2. Expected Behaviour

All **CELEO Group** Professionals must guide their professional activities towards the highest business ethics standards, as well as towards applicable policies, enabling regulations, procedures, and legislation. Professionals will also attend to their contractual obligations concerning confidentiality, information security and the proper use of corporate resources. Should any **CELEO Group** Professional comport themselves in violation of the provisions of this **Code of Ethics** or its enabling regulations, disciplinary measures or sanctions could be imposed in accordance with the provisions of applicable labour legislation, as well as the content of our Disciplinary Regulations.

### 5.3. Where to look for advice

**CELEO Group** currently has different Compliance Bodies, the Compliance Committees, which are responsible for ensuring the supervision and compliance with the **Code of Ethics** and its enabling regulations. The Compliance Officer is, from a practical standpoint, the person that may resolve any questions or doubts regarding interpretation that may arise with respect to conduct standards, enabling regulations or the legislation applicable to each matter. The Transparency Channel is the official manner in which questions or consultations may be made, as well as to report any irregularities or infractions that are detected.

### 5.4. Protection against retaliation

**CELEO Group** will protect any reporting parties against retaliation when they report any failure to comply or irregularity regarding conduct standards or enabling regulations on a good faith basis. Retaliation against any person will be considered

	<p style="text-align: center;">CODE OF ETHICS</p>	<b>Code</b>	CPL_RCS_CORP_001
		<b>Version:</b>	2.0
		<b>Page</b>	6   14

as one of the most serious failures to comply and, therefore, will be object of serious sanctions.

The responsible participation of every Professional is essential in order to support and continuously improve our Compliance Management System and our general culture of ethics and compliance.

### How to make the correct decision?

Making the correct decision is essential for the performance of the business activity. However, there are times at which making the correct decision is not easy.

When we face a difficult decision, we should ask ourselves the following questions:

1. Does it comply with the Code of Ethics at CELEO Group?
2. Is it legal?
3. Is it in line with CELEO Group's principles and values?
4. Would I feel comfortable if the decision that I have made or the action that I have taken is made public?
5. Would I like it to be done to me?
6. Would these actions or the decision made be seen in a good light by my family or colleagues and the employees and shareholders of CELEO Group?

If the answer to any of these questions is "no" or if doubts arise, you should obtain advice through the Transparency Channel before proceeding.

## 6. CELEO'S CONDUCT STANDARDS

### 6.1. CELEO respects and promotes respect of legality

Integrity and zero tolerance are the principles of excellence that must prevail when carrying out professional activities within **CELEO Group**. Consequently, **CELEO Group** is fully transparent in its actions and respects and complies honestly with the law in all business and geographic areas in which it operates, as well as with the highest conduct standards applicable. **CELEO Group** rigorously applies its **Compliance Management System**, encouraging compliance by its Professionals and the Third Parties with which it maintains relationships, while respecting the conduct standards settled in this **Code of Ethics** and the commitments acquired by the Company, in line with international good practices. This is all presented in **CELEO Group's "Compliance Policy"** and in the internal regulation developed.

At **CELEO Group** we are all responsible for following the law and working appropriately within our professional environment, which will maintain and improve the Company's reputation and credibility as a point of reference in the market in which we operate.

**CELEO Group** fully supports the Universal Declaration of Human Rights and pays particular attention to equal opportunities regardless of the specific characteristics of the individuals concerned, avoiding child and forced labour and also respecting the rights of ethnic and native minorities when carrying out its business.

### Protection of Human Rights

Remember:

Report or consult any incident relating to possible violations of Human Rights with the Transparency Channel.

Take the appropriate measures with respect to business suppliers and partners based on CELEO Group's internal regulations in order to confirm that they are committed to the respect of Human Rights.

## 6.2. CELEO is against corruption, fraud and bribery

**CELEO Group** rejects any practice that violates anti-corruption and anti-bribery legislation whether in the public/private national or international environments and maintains a principle of zero tolerance of any practice that may harm the reputation of the organization or negatively affect its public image. To do so, it internally developed the following mandatory regulations and procedures for all Professionals at the Company which are included in the Compliance Management System:

- The "**Anti-corruption and Anti-bribery Regulation**" governs interactions with public officials (servants) and Third Parties with which **CELEO Group** maintains relationships, establishing conduct standards and a prohibition against gifts, offers and promises in general that could be considered to be bribery/corruption. **CELEO Group** expressly regulates business courtesies (invitations to meals, events or travel) to/from Third Parties and prohibitions or restrictions to be considered respect public officials. It also establishes the criteria that must be borne in mind and the steps to be taken for their authorization through the Transparency Channel.

The "**Anti-corruption and Anti-bribery Regulation**" also forbids any contribution or donation to any political party, or their representatives on behalf of the Company and establishes the criteria and processes for the possible authorization of donations to or sponsorships of Non-Governmental Organizations.

- **CELEO Group** also regulates the settlement of employee expenses and travel through the "**Travel and Expenses Procedure**" in order to control the application of expenses incurred and to prevent their abuse.
- It also establishes the principles that **CELEO Group** applies to the acquisition of materials and products, as well as for the selection and control of our suppliers and business partners, in general through (i) the "**Purchasing and Contracting Services Procedure**"; and (ii) the "**Supplier Approval Procedure**".
- The document "**Purchasing and Contracting Services Procedure**" establishes the reinforced due diligence measures that **CELEO Group** adopts in advance of contracting with Third Parties that, due to their special nature, may expose the Company to greater risk, in order to identify and mitigate such risks.
- Finally, **CELEO Group** regulates conflicts of interest to avoid possible cases of corruption among individuals through the "**Conflict of Interest Regulation**", which is described in the following conduct standard (6.3).

In the case of any doubts, we should ask ourselves:

1. Is there an intention to influence the recipient in terms of making commercial decisions or to obtain an unfair commercial advantage?
2. Are gifts and invitations allowed in accordance with the conditions established in the contract and applicable legislation?
3. Is it a one-off gift or does it take place frequently?
4. If anyone close to you knew of your action, would you be embarrassed?

If you do not know the answer to any of these questions, you should consult obtaining approval for your initiative by providing notice to the Transparency Channel.

The **active bribery** of public officials consists in offering, promising or delivering any valuable object to public authorities, officials (servants) or employees, national or international, to induce them to carry out actions contrary to their duties, actions within their competency, to refrain from performing or delaying those they should perform or simply to offer the object as consideration for their position either spontaneously or at the request of the public authority, official or employee.

### 6.3. CELEO is against conflicts of interest

In relation to the preceding conduct standard, and as an additional mechanism to prevent corruption risks among individuals and to encourage the integrity of our actions, **CELEO Group** has developed a series of conduct guidelines to avoid conflicts of interest within its business, which are set out in the "**Conflict of Interest Regulation**":

- Independence when carrying out professional activities is an essential principle of performance inspired by the freedom of judgement, equanimity and loyalty to the Company. Conflicts of Interest arise when any personal situation that causes a decision or an action to benefit the person or entity dominating the situation, or a third party, instead of being taken to the exclusive benefit of **CELEO Group**.
- The internal regulation of those situations requires a report be made to the Transparency Channel by the person aware of such a situation or is conscious of being a participant in a possible conflict of interest. Details of the situation must be provided so that it can be assessed and a determination can be made as to whether it could effectively compromise the independence of the affected party.
- As a general principle, anyone that is affected by a possible conflict of interest will abstain from making, participating or intervening in any related decisions or actions until the relevant authorization is obtained or the Compliance area deliberates over the reported situation.

Conflicts of interest may arise in any professional situation and could involve family members, acquaintances, friends or entities in which the foregoing hold a majority interest or control.

**CELEO Group** promotes dignity, integrity and diversity at work and considers each employee based on their skills and talent. **CELEO Group** will pursue any type of labour, moral and sexual harassment and follows the principle of zero tolerance regarding any behaviour of this type.

Any type of harassment or discriminatory attitudes towards Professionals and/or Third Parties with which commercial relationships are maintained is unacceptable, as is any intolerable behaviour, abuse, threats and, in general, any infraction of the "**Harassment or Discrimination Prevention Regulation**", which must be reported as soon as known or when such a situation arises, even if not personally involved, through the Transparency Channel.

#### 6.5. CELEO protects and ensures information

**CELEO Group** has a "**Security of Information Policy**" and internal enabling regulations, which must be known by Professionals as from the time they joined the Company. Information is an intangible asset that must be handled with maximum diligence, guaranteeing its confidentiality and integrity. All Professionals must comply with their confidentiality and integrity obligations with respect to information they have access to when performing their duties, whether concerning **CELEO Group** or any Third Party and ensure that it is protected and not released during the time they work for the Group and afterwards.

**CELEO Group** Professionals must be aware of the risks involved with handling information, particularly when it is in electronic format, and respect information and restricted access protection systems.

- **Data protection**

**CELEO Group** respects the personal data of its Professionals and the Third Parties with which it maintains business relationships.
